

Stacked in your favor

- ✓ Stacking projectors allows you to create brighter images for big screens and brightly lit areas
- ✓ Achieve up to 8,000 – 20,000 lumens*
- ✓ Stack two projectors of the same model
- ✓ Hitachi offers models for vertical stacking, or horizontal side by side use
- ✓ No additional equipment needed
- ✓ Fine adjusting is made easy using Keystone and Perfect Fit
- ✓ Projectors can work together or independently
- ✓ Peace of mind for important presentations, if one projector stops working the other will automatically continue the display

*Lumens vary by model
Image positions may shift over time due to temperature changes, vibration or shock, or tension and weight of the connection cables. Readjustment may be needed.
Refer to the User's Manual Instant Stack Guide for complete instructions.
