Hitachi America Ltd.'s Trusted Line of Projectors and New Interactive Flat Panels Help Businesses Meet Their Needs

CHULA VISTA, California, August 17, 2017 –With a variety of virtual collaboration systems available, it's important for teams to be able to gather around a single screen to brainstorm, hold meetings and make important decisions. With a full line of corporate projectors and the new interactive flat panel displays, Hitachi America Ltd. provides the best solution for any collaborative space.

Corporate meeting spaces vary just as much as the companies themselves — from small four-person huddle rooms to large auditoriums. While business collaboration software is great for teams to have centralized documents, to-do lists and updates on a project, the software doesn't solve some of the biggest issues: screen share lagging, confusion over which document to view, and notes after the meeting that don't match. With teams looking at a single screen, these issues can easily be eliminated.

“One of the biggest things we've learned from talking to our customers is that each meeting space is different,” says Mike Morin, Manager, Strategic Sales Development, Hitachi America, Ltd. “Companies that have smaller collaboration spaces typically want a more hands on solution, which is why we created the interactive flat panels. It's a great way for teams to come together and visually work together on a single screen. Other companies that have larger meeting spaces will turn to a solution that involves a projector to ensure everyone in the meeting can see the screen. We've worked to ensure that we have a product for every type of solution.”

Hitachi's new interactive flat panel line includes a Full HD 65", and Ultra HD 75" and 86" displays. Features include easy to use front HDMI and USB inputs, 10 or more simultaneous touch, front facing stereo speakers and a PC-Less writing function on the 75". All are Windows™ and macOS® compatible and Crestron Certified and come with a 3 year onsite warranty.

Hitachi's projector product line includes professional DLP, LCD, Laser and LED projectors; interactive LCD projectors; ultra short throw LCD projectors; short throw LCD projectors, entry projectors and a wide variety of accessories that ensures a projector will be ready to go in any installation.

Whether a company is a small start-up with five employees, or an international Fortune 500, it's important for the meeting space to meet the needs of the employees. With Hitachi America Ltd.'s interactive flat panel displays or one of its many projectors, there is a solution for every type of meeting space.
