Hitachi America Ltd. Introduces Interactive Flat Panel Displays at InfoComm 2017

ORLANDO, Florida, June 14, 2017 – Hitachi America, Ltd. Digital Media Division introduced three FHD and UHD Interactive Flat Panels Displays at InfoComm 2017. The new interactive flat panels are available in 65” FHD and 75” and 86” UHD displays.

With full HD capabilities, the 65”, 75” and 86” screens are made of anti-glare tempered glass and a +/- 2mm accuracy on the 10 or more simultaneous points of touch. Every display is equipped with a remote control, 2 stylus pens, an HDMI cable and a USB cable for use in the easy access front module or from the standard input panel.

HD interactive flat panel displays are a simple tool for education facilities that allow students to experience hands on learning. The 10 or more simultaneous points of touch makes group work easy by allowing students to work together.

Similarly, the interactive flat panel displays are also a great tool for corporate settings because employees can hook up computers directly to the display and share presentations, documents and video during a large meeting. The stylus pens allow coworkers to take notes and make edits directly on the screen.

InfoComm 2017 attendees can visit Hitachi America, Ltd. at booth #3429.
